

Topics Covered

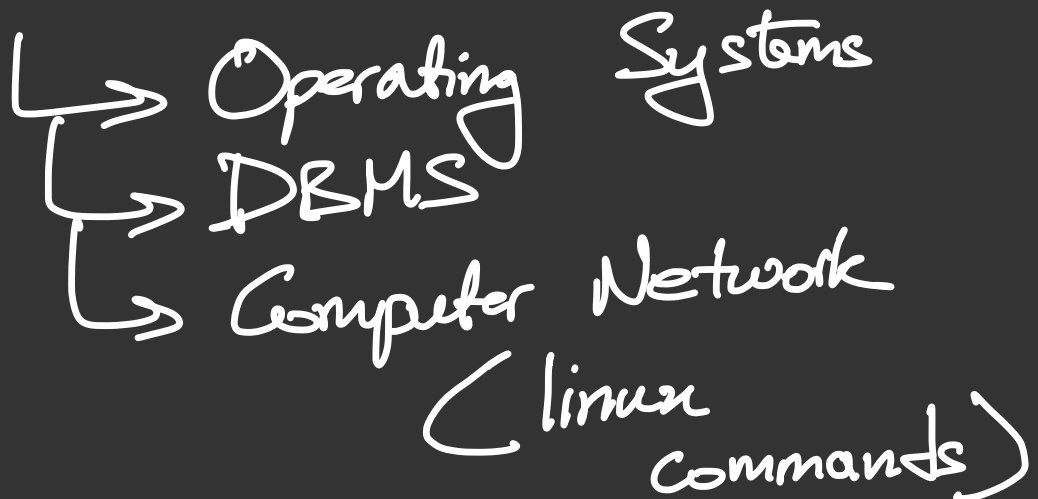

- Array (Sorting, two pointers, sliding window)
- Binary Search
- Bit wise operators
- Pointers
- Recursion
- OOPs
- Linked List
- Stacks
- Queues
- Binary Tree

Topics to-do

- Heaps
- Hashmaps
- Tries
- Back tracking
- GRAPHS
- Algorithms
- Dynamic programming

Which are linear & non-linear?

Computer Science fundamentals

Study Plan

① Resources for learning

↳ Complete C++
Love babbar

→ Strivers A2Z DSA
take U forward
(for questions too)

② for practice

(i) Interview Bit

↳ start solving topic wise
medium to HARD
then move to
next topic

(ii) LeetCode

(not too much focus on
contests but give it a try)

→ focus on problem solving and pattern recognition

→ know your weak sections
(C)
the kind of topics where
you lack
(NOTE IT DOWN!!)

* While applying, ONLY APPLY
for software engineering
roles.

→ api?
→ Node JS }
MongoDB }

→ DB?

React JS → visualise?

→ limitations of all

→ Software Engineer
